

COOLER BY DESIGN

Hollister-Whitney Gearless PMAC Machines

It took a lot of cool design work to create a super quiet, energy-efficient, cool running, gearless PMAC machine. We only use sealed, field replaceable, maintenance-free bearings (**rated for 15 years of continuous duty**). Hollister-Whitney PMAC machines feature field replaceable sheaves, multiple brake positions, and can fit through normal 36 in. machine room doorways. **2:1 Designs are ideal for**

MRL's. 1:1 Designs are perfect for geared traction mods — counterweighted 60/40, and available for 3/8, 1/2, and 5/8 in. ropes so existing counterweights and deflector sheaves can be retained. If you are looking for true value, long life, and outstanding performance, then buy American. That's more than just a cool idea — **it's the intelligent choice.**
