

# MOVFE 2500 - HH

## Modern Heavy-Duty, Non-Proprietary Closed Loop Door Operator

Ideal for both new installations and modernization jobs

**Controller input:** 24-230V AC/DC

**Input Voltage:** 115/230VAC

**Non-Contact Sensors:** optical and hall effect

**LED Convenience Indicators:** on main board to display status of all important functions

**Toggle Switches** for Manual Testing

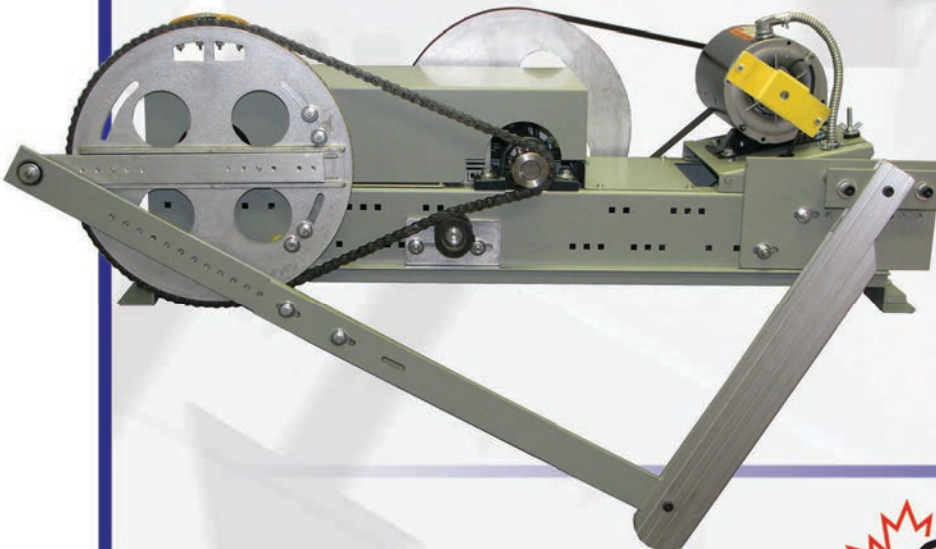

**Parameter Unit** (keypad programmer) with LCD display is included to adjust, monitor, copy and upload parameters, and to learn the door width distance

**Serial Communication:** CAN (Controlled Area Network) protocols can be used with GALaxy Controls

### Advantages of upgrading

- Closed loop circuitry, utilizing both VVVF and encoder feedback
- Better control of doors
- Additional I/O board for control of narrow or heavy lobby doors
- Plug-And-Play detector edge capability
- 1/2 Horse Power Motor tested to move up to 1500 pounds
- All pivot points utilize precision bearings providing a smoother and much greater life expectancy
- Auto fallback to slow mode in case of DOL, DCL or encoder failure, preventing any afterhours or weekend service calls

Conversions from existing  
ECI 895, ECI 1000,  
or any ECI chassis  
installations are  
quick and easy

The ECI line of door products is now manufactured and supported by GAL Canada
